Tesseract installer for Windows

Normally we run Tesseract on Debian GNU Linux, but there was also the need for a Windows version. That's why we have built a Tesseract installer for Windows.

WARNING: Tesseract should be either installed in the directory which is suggested during the installation or in a new directory. The uninstaller removes the whole installation directory. If you installed Tesseract in an existing directory, that directory will be removed with all its subdirectories and files.

The latest installers can be downloaded here:

- [tesseract-ocr-w32-setup-v5.2.0.20220712.exe](#) (32 bit) and
- [tesseract-ocr-w64-setup-v5.2.0.20220712.exe](#) (64 bit) resp.

There are also [older versions](#) available.

In addition, we also provide [documentation](#) which was generated by Doxygen.
